

RQ1-RQ2

Internal semantic representation

4,142 valid -> 3,963 eligible
2,383 mapped -> 68 topics

RQ3

Indexed scientific context

9 lines -> 40 OpenAlex topics
10-country comparison

RQ4

Screened research-front retention

11,325 IDs -> 73 associations
30 corpora -> 1,084 papers

Longitudinal semantic representation of publisher knowledge

Cross-layer comparison with construct-specific scales

Thematic structure | indexed activity | screened retention
